PROJECTS

NFT marketplace (Js, ethers.js, alchemy's api)

[GitHub](#)

marketplace is place for accessing the NFT's and which is done by alchemy API's and some basic react, here we can get NFT's by address of NFT holder or by NFT's contract address.

MovieHub (js, omdb's api, React)

[Github](#)

movie hub mainly covers my frontend part as there is fetching of api with axios and adding the components from material-ui makes more stylish, here we can get all the latest movies with filtering options are also there it is multipage application

on-chain-DAO (rainbow-connect, wagmi, ethers.js, React)

[Github](#)

on-chain-dao is community where its member can raise some proposal for which NFT should community buy it consists of many tools like rainbow-kit and wagmi which makes it easier and also there are smart contracts here voting is directly done on-chain.

my-wave-portal (ethers.js, React)

[Github](#)

my-wave-portal is my first web3 project using ethers.js as connecting wallet and react for frontend here the information of any wave stores on-chain permanently and also there is frontend button for contract value withdraw.
